About me

I create technical documentation: user guides, architecture documents, instructions, API references. I work in the Docs as Code paradigm: I automate processes, set up CI/CD, and deploy and maintain documentation portals. I write and edit texts in Russian and English, draw illustrations and diagrams, and sometimes write interface text.

I use my development knowledge in the profession. For my thesis project I built a service that checks English-language documentation using neural networks.

I work with engineers, team leads, PMs, POs, information security and sales. I use VS Code, Git, SSG, Confluence, Jira, Figma and other tools. I took part in projects and competitions run by KROK, Alfa-Bank, VK, VTB, T-Bank (Tinkoff) and VkusVill, where I solved tasks at the intersection of technology, analytics and UX.

Work experience — 5 years 4 months

February 2024 –
May 2026
2 years 4 months

T1 Holding, Innotech

Moscow, t1.ru

Technical writer

- Created technical documentation from scratch for Mapius, an API management platform from T1 Innotech.
- Introduced a knowledge management system in the Docs as Code paradigm using GitLab CI, Docker and Kubernetes.
- Built and standardized documentation processes in an Agile environment and integrated them into the development teams' work cycles.
- Co-author of a tool for automatically deploying Docs as Code projects: teams launch documentation portals on their own, without DevOps engineers or technical writers.
- Prepared a documentation package for commercializing the platform, including presentations and onboarding materials.
- Created a documentation style guide. Brought terminology, structure and formatting to one format.
- Developed the set of documents for registering the product in the Russian software registry (ERRP).

October 2022 –

Baikal Electronics

Russia, baikalelectronics.ru

Technical writer

- Developed documentation for the hardware and software side of the Baikal-T, Baikal-M and Baikal-S processors.
- Developed an AI agent for support: the system analyzes user requests and generates answers from the company's internal documents. It handles 60% of requests without staff involvement (2023).

- Translated documentation from Russian into English for international partners.
- Introduced a knowledge management system in the Docs as Code paradigm.
- Regularly took part in documentation peer reviews.
- Created a set of 50+ components for formatting diagrams and schematics in documentation.

February 2021 –
October 2022
1 year 9 months

Financial University

Moscow, fa.ru

Python developer intern

- Took part in developing a system that automatically processes applications received by an admissions committee. Together with the team I reduced the processing time from several days to several hours.
- Wrote the user guide and onboarding documentation for employees.
- Tested the system and worked on extending its functionality and on UX writing (UX texts).

Education

2026
Master's

National Research University Higher School of Economics (HSE University), Moscow

Faculty of Computer Science, Systems and Software Engineering

2024
Bachelor's

Financial University under the Government of the Russian Federation, Moscow

Faculty of Information Technology and Big Data Analysis, Applied Informatics

Courses

2025

Agile for Development Teams · T1 Innotech

2023

Cloud Services Engineer · Yandex

2022

Database Foundations · Oracle Academy
